

Annual WHMIS Refresher Quiz Information

The primary objective of WHMIS is to ensure you understand the hazards of materials handled at work and that you are able to use that information to protect yourself from hazardous exposures. Completing an annual refresher quiz is for your protection to ensure your level of WHMIS knowledge stays current.

Mohawk College recently changed to an on-line WHMIS training program delivered through “WebCT”, one of the college’s e-learning platforms. You must complete one of the on-line WHMIS courses (Basic or Advanced) before you are able to take the annual refresher quiz. The annual refresher quiz can be found in the “Quizzes” section.

Click here to go to WebCT and log into your account to complete your annual refresher quiz.

<http://webct.mohawkcollege.ca/>.

Click here for further instructions if you haven’t completed your on-line WHMIS training or you forget how to log into WebCT.
