

# Are you exploring a new digital health application?

An interactive visit from Mohawk College's mHealth & eHealth Development and Innovation Centre (MEDIC) can help. Through a 20-hour solutioning exercise, working with our digital health solution architects and designers, we can help you develop a technology approach along with a roadmap for implementation.

Mohawk College's mHealth & eHealth Development and Innovation Centre (MEDIC) is home to the Digital Health Technology Access Centre (TAC), a national resource for the Canadian digital health sector. As a TAC, MEDIC helps companies develop new applications and integrate with existing systems in the digital health space. An interactive visit can help answer many of the questions that arise when starting this journey.

## Are you eligible?

### Do you have:

- a minimum of one full-time employee receiving a T4, but less than 500 employees;
- operations in Canada, with a CRA Business Number;
- a demonstrated desire to grow and generate profits.

If you said **yes** to all, give us a call at 905-575-1212 ext. 3809 or visit [mohawkcollege.ca/medic-interactive](http://mohawkcollege.ca/medic-interactive)

Tech-Access <sup>\*</sup>Canada

National Research  
Council Canada

Conseil national de  
recherches Canada

This program is brought to you by Tech-Access Canada with support from the National Research Council of Canada Industrial Research Assistance Program (NRC IRAP)

# What do you get?

# 1

## Strategy Discussion

The first step is to get an understanding of what you are looking to achieve, and what system components already exist, if any. We expect two to three one-hour meetings may be required.

# 2

## Joint Design Workshop

Once we understand where you wish to go, we will prepare and run a joint, high-level, design session with you to drive out the major components of a technology architecture and the primary processes to be developed. This will include health data privacy considerations such as PHIPA and HIPAA legislation.

# 3

## Implementation Roadmap

Based on the workshop outputs and other factors we have collected, we will develop an implementation roadmap which includes:

- technology recommendations;
- high-level architecture;
- phased development approach;
- funding opportunities.

As part of the interactive visit program, you'll receive 20 hours of high level support. This should help you get started, and MEDIC is ready to help you past this point too.

## Cost

### \$2,500

Clients of NRC IRAP may be eligible to receive our services at a reduced cost. All companies will be required to cover a **\$250 admin fee and 6-8 hours of employee time** dedicated to working with us.

## Plan your project with MEDIC

Call us at 905-525-1212 ext. 3809
