General Description of Duties:

Operates machinery in the Overhaul Repair Shop. Must repair complex parts, producing to close tolerances.

Verifies and inspects work performed with all available types of measuring equipment. Ensures compliance with Engineering and Overhaul instructions.

Utilizes all measuring equipment in order to maintain specified tolerances.

Performs basic tool grinding requirements.

Performs own inspection as job progresses. Reports any discrepancies that cannot be altered independently.

Machines parts as requested on the Rework Material Shop Order or salvage drawing.

Machines new bushings: reaming in line to final dimension as per Rework Material Shop Order or per Fits and Clearances Table.

Skills and Experience Required:

Community College Diploma (3 year program) preferred or 40-week Machine Shop course

1 year of relevant machining experience. Experience with verniers, micrometers, dial bores, and thread gauge.

The successful candidate must meet all requirements under the Canadian Controlled Goods Program (CCGP) and the International Traffic in Arms Regulations (ITAR)
