

Module X – Title

Please fill out this module layout template for every module within the course you are developing. This will be the first page students open in every module.

Introduction

[Provide an introduction to the module by identifying the topic(s), their relevance to the course, program and profession. Make ties to student's prior knowledge, previous modules, and/or courses where possible to help learners integrate concepts with existing mental schemas.]

List of main topics / subtopics within the module

- 1.
- 2.
- 3.

Learning Outcomes / Elements of Performance

In the table below, list elements of performance (module level) and how they feed upward to course learning outcomes.

[Elements of Performance are stepping stones that scaffold student learning to achieve course learning outcomes. Please list the Elements of Performance (found on your Course Outline) that students will meet in each module. Also include the corresponding course learning outcome it aligns with.]

Element of Performance:	Related Course Learning Outcome:
	CLO #
	CLO #
	CLO #

Read

- List readings and links/URLs (when applicable) to be read for the module
- Include estimated average time to complete each reading

Watch

- List videos to be watched for the module
- Include time length of each video

Complete

- List learning activities, exercises, assignments, etc., that need to be completed for each module
- Include estimated average time to complete each activity

Attend

- List classes, seminars, labs, online lectures, etc., that need to be attended for the module
- Include estimated time required to attend each class, seminar, lab, lecture, etc.

Summary

[Provide a summary of the module, the expected course learning outcomes, and how this module will lead and/or connect to the next module and the course in general.]

References

[Please list APA format (6th edition), all sources used in this module including articles, websites, videos, etc. More information on APA formatting can be found [here](#)]
